Wisconsin

Inclusive HEALTH

Special Olympics Wisconsin is working toward more inclusive health practices for our community. Our Inclusive Health initiative is raising awareness around the issue of health disparities facing people with Intellectual Disabilities. We are doing this by fostering development focused on delivering care to people with ID, and ultimately creating communities where Special Olympics athletes and others with ID have the same access to health and wellness resources and can attain the same level of good health as others.

Perfect for:
healthcare providers
universities
government health agencies
community partners

SOWI INCLUSIVE HEALTH TRAININGS DISCUSS:

- health disparities for people with intellectual disabilities
- barriers to quality healthcare for this population
- solutions to the problem: inclusive health
- Q&A with an athlete
